-Bruce Lee'

Swimming Pools

In ground Pools

In ground pools are the most commonly constructed pools we can see around. They are built by digging the ground and reinforcing with various water proof materials like fibre glass , concrete etc.

Above ground Pools

One of the reasons above-ground pools have become more appealing in the economy is their lower price tags. Also they are easier to work with certain types land, including rocky areas.

Architectural Pools

An architectural pool must have structure, definite lines and often echoes the form of the house and uses the same materials for a cohesive look. These pools are often geometric & sophisticated.
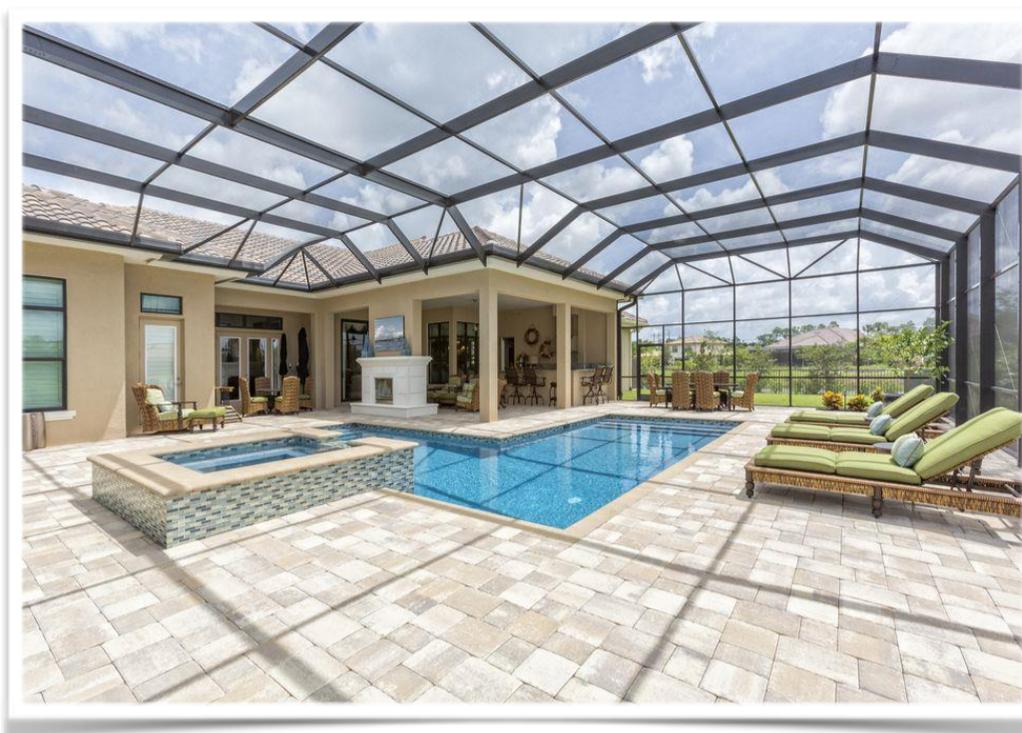

Indoor Pool

An indoor swimming pool is pretty straightforward -- it's under a roof and insulated by walls. Indoor pools are usually simple, geometric shapes and are built for the purpose of swimming or training throughout the year, especially in cold climates.

Family recreation Pools

Awe-inspiring water features, elaborate slides, tunnels, boulders and a general for-all-ages appeal is what recreational pools are all about. If you like to entertain, like noise, activity and excitement, this may be the pool of your dreams -- or at least your kids' dreams.

Infinity Pool

Infinity pools are also known as infinity edge pools, vanishing edge pools, negative edge, zero edge, or disappearing edge. Infinity pools are always custom-built and should be designed to highlight a view. Done right, an infinity pool gives one an illusion of a sheet of water dropping off over the edge of the property, like a waterfall, although you can't see or hear falling water.

Lap Pool
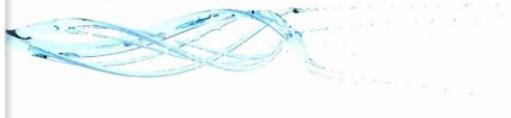

A lap pool is a swimming pool built and used for fitness and health purposes. Lap pools are usually long and narrow, often more than 50 feet in length. Typically, lap pools are a rectangular shape and can be built on long, narrow lots

Plunge Pools

"Plunge" and the type of pool known as a plunge pool couldn't be any more different. Plunge pools are small, cold-water pools that have been used for thousands of years in Chinese medicine. Many swimmers and athletes like to plunge into a pool of cold water after a heated workout or sauna or spa session, believing it has therapeutic benefits.

Kids Inflatable Pool

The inflatable models have been around since a long time , making pool ownership a reality for almost anyone with a porch or plot of ground -- even a sidewalk or driveway. They are easy to assemble , use and then pack up again.

Fountains

In landscape architecture and garden design, a water feature is one or more items from a range of fountains, pools, ponds, cascades and waterfalls A water feature may be indoor or outdoor and can be any size, from a desk top water fountain to a large indoor waterfall that covers an entire wall in a large commercial building, and can be made from any number of materials, including stone, granite, stainless steel, resin, iron and glass. Most water features are electronically controlled, ranging from simple timer actuators to sophisticated computerized controls for synchronizing music to water and light animation.
Water features often offer additional benefits to homeowners, such as increased curb appeal, home value, reduced noise pollution, increased humidity in dry regions and improved air quality.

Sub- star Qua Lite - Surface Mount

Material : Aluminium / Stainless steel
Input : 12 V DC
Power : 4.5 Watt
Colours : White/ Warm white/ RGB
Protection IP 68
Diameter : 73 mm

Sub- star Qua Lite - Recess Mount

Material : Stainless steel
Input : 12 V DC
Power : 4.5 Watt
Colours : White/ Warm white/ RGB
Protection IP 68
Diameter : 73 mm

Splash Qua Lite - Surface Mount

Material : Stainless steel / Aluminium
Input : 12 V DC
Power : 10 Watt
Colours : White/ Warm white/ RGB
Protection IP 68
Diameter :130 mm

Splash Qua Lite - Recess Mount

Material : Stainless steel
Input : 12 V DC
Power : 10 Watt
Colours : White/ Warm white/ RGB
Protection IP 68
Diameter :120 mm
